Добавить к сайту ссылки на научные и библиометрические ресурсы.

# 1 задание

Я разместила ссылки на них:

The screenshot shows a web browser window with the address bar set to `localhost:1313`. The browser's address bar and tabs are visible at the top. The main content area displays a markdown file named `_index.md` located at `~/blog/content`. The file contains contact information for Bella-Pinega-2, including country, office hours, and contact links. A sidebar menu is visible on the left side of the browser window, listing various links and resources.

Colors will prevail in the presentation, what will be the transition

Usually visually distinguish: title, main / content, slide separator (presentation blocks) and final slides.

### Stage 5 Filling the presentation

It is necessary to transfer materials from the second column of the presentation. Remember that in addition to the main material, slides should contain additional graphic materials (for example, icons - arrows, stars, etc.). add them to the slides.

### Stage 6 Optimization of texts and graphics

It is important to decide which of the text materials can be repeated. The text must be left, then you must adhere to the following rules:

- try to shorten large paragraphs of text or split them into several parts
- do not use center alignment for large blocks of text (it is very inconvenient)
- enumerations are best represented as lists;
- do not use animation effects for texts.

Quantitative data can be visualized using charts - this will add clarity to the material presented.

```
