About the version control system

What is a "version control system" and why is it important? A version control system is a system that records changes to a file or set of files over time and allows you to revert to a specific version later. For file versioning, this book will use software source code as an example, although you can actually use versioning for just about any type of file.

If you're a graphic or web designer and want to save every version of an image or layout (most likely
